## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Weinstein et al. U.S. Patent No. 4,753,958.

Weinstein et al. disclose a method for treating psoriasis comprising: the steps of applying the skin with a topical photoactive drug, and exposing the affected skin with ultraviolet laser light as presently claimed (see the abstract; col. 3, line 65 to col. 4, line 4; col. 5, lines 1-32; and col. 8, lines 28-38).

2. Claim 7 is rejected under 35 U.S.C. 102(e) as being anticipated by Robinson et al. U.S. Patent No. 5,773,609.

Robinson et al. disclose a method for treating psoriasis comprising: the steps of applying a photoactive drug to the skin, and exposing a laser light to the affected skin being treated (see col. 2, lines 51-55; col. 18, line 63 through col. 19, line 12; and claims 1-5 ).

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent to Eckhouse discloses a method and apparatus for treating psoriasis, the method including the step of irradiating affected skin with an electromagnetic energy (see the abstract and col. 1, lines 28-59).
